

**NEW HAMPSHIRE
“CAREER-START”
ADVANCED MANUFACTURING TRAINING PROGRAM
An Intelitek and Workforce Training Resources Partnership**

**INTENSIVE, IMMERSION TRAINING PROGRAMS PROVIDING STATE-OF-THE-ART SKILLS IN
HIGH TECHNOLOGY MANUFACTURING AND MACHINE SHOP OPERATIONS
Each Course Limited to 15 Trainees**

Advanced Manufacturing Technician (ATM)

Scheduled Manchester February 4th, 2008

A comprehensive, 240 hour full-time program covering all the skills training necessary for entry level employment in the computer-aided advanced manufacturing machine shop environment. Trainees utilize unique hands-on learning in industrial technology and cover a range of skills areas: machine operation, hydraulics, pneumatics, basic electronics, CAD, CAM, introductory automated machining and the use of computer controlled CNC machines. The program includes a dynamic soft skills component on employability skills, working in teams and a remedial mathematics program to assist trainees. A National NIMS Certification process commences with this course for trainees to pursue. The course includes selective on-job training.

Computer Aided Advanced Manufacturing Machine Operators (CAAMMO)

Scheduled To Be Announced

Based on industry and employer demand, this 240 hour course, utilizing state-of-the-art computer based training technology that replicates the machine shop operations and CNC controllers, provides an excellent range of skills for employment as an entry level machine operator in the advanced manufacturing industry sector. The course includes extensive CNC and computer aided machine operation.

Advanced Automation Robotics Technicians (ART) Course

Scheduled To Be Announced

This more advanced program is designed to provide trainees with a wide range of skills in the basic robotics and automation engineering and operation utilizing and dynamic variation of software tools that assume no previous robotics knowledge prior to starting the course. With an extensive range of course options trainees build and operate robotics equipment during the 240 hour program.

Intelitek is a New Hampshire based world-leading developer, producer and supplier of engineering and manufacturing technology training systems. As a natural extension of the Intelitek commitment to providing the highest quality instructional material and technology tools, Intelitek has developed a complete suite of e-learning solution designed to prepare today's trainees with "career starting" skills, knowledge and understanding needed for tomorrows world.

Workforce Training Resources (WTR) is a New Hampshire based career training provider with a single goal of providing solutions to the Granite State's workforce needs and responding to employer demands for trained employees. WTR's management team provides extensive experience in workforce development, career training and economic and business development projects globally.
